

Regarding the proposed lower FM power for public radio

I listen regularly to radio station KLOVE, a positive uplifting Christian Station. Every day they pray over the air, they encourage me with the reading of God's word and I never ever have to be concerned about hearing any filthy language or sexual innuendos – EVER – the music is clean and God's word comes through in each of the programs offered.

I would be very, very upset if you were to change the frequency settings as I have trouble getting the station as it is when I travel to various areas of my city – to make it even harder to receive is just not acceptable. I urge you, if anything, to INCREASE the amount of power the Christian stations can use – we need more positive broadcasts with unquestionable morals and ethics, transmitted in this great country – not more trash over our airways.

Today's media is full of negative and degrading and demoralizing language – it is steadily eroding the moral fiber of the United States – our country was founded by people who wanted to worship God and had strong morals – if they were to hear some of the filth being broadcast today they would be greatly distressed over what has happened. We need more honest, truthful media broadcast with no swearing, no sex, respect for all people especially our elders, and the knowledge of the power of right and wrong - the courage to do what is right. KLOVE offers hope to millions of people who are on their last thread – unless this country repents and turns back to God there is no hope. KLOVE and other Christian radio stations offer everyone the opportunity to hear the good news and gives back hope.

PLEASE DO NOT LOWER OUR POWER SIGNALS. We who love the Lord will pray for YOU, that you will make decisions based on what is good for the people – in accordance with God's will, not what is going to make some filthy pornographic producer or power hungry moguls more money.

Thank You
